4/8/2020

Dear Homeowner,

April 7th, 2020 brought powerful storms with high winds and hail to your area. Your property may have experienced exterior damage that is not immediately noticeable (roof, siding, gutters, windows, etc). It's of utmost importance for your property to get inspected as soon as possible to prevent possible future damage. These damages can creep up in the form of a leaky roof a month or even year from now. The sooner you act the better chances we have to file a claim with your insurance company and fix it for little or no cost to you.

Our company specializes in storm related damages and provides you with the highest quality workmanship and professional and courteous service. We are a locally owned and Better Business Bureau accredited business.

We offer completely **FREE** roof and siding inspections with **NO OBLIGATIONS**. With the current health crisis, we also offer contactless inspections as per the CDC guidelines. We will also work directly with your Insurance Company to make this process as easy and smooth as possible. Let us make your home as good as new in no time at all.

Give us a call at 708-395-5356 to schedule your free inspection today.

Sincerely,

Magdan Construction, Inc.
